

Aiming for the Stars....

Our SSC Exam Topper - Yash Vadhavkar

How did you and your parents feel about you scoring 96% in SSC and topping in the school ?

It was one of the most memorable moments of my life. I was completely overjoyed and excited, and so were my parents. It was like a dream come true for me. It is a very special experience which cannot be expressed in words.

What strategies or plan did you use through the year in Std X?

There was no particular plan or strategy as such. The idea was to keep things simple. Studying regularly and being upto date was the only plan.

How do you think the school contributed to your success?

The school played a very significant role in my achievement. The school environment is very cordial, adjustable and student friendly. There was tremendous support from all my Std X teachers and also the school authorities. I would like to take this opportunity to thank all my teachers from Kindergarten to Std X. And last, but not the least our Principal Monica Ma'am who was always an epitome and model of inspiration.

How did your parents contribute to your achievement?

Support from parents is very important. My parents never pressurized me and I was always in a free environment. But at the same time, they always kept on building my confidence. Without their support, I would not have been able to achieve this.

Did you follow any special diet/health regime?

There was no specific diet or health plan, but as far as possible, I tried avoiding junk food in order to remain healthy, as it is very important to maintain your health during this year. For better concentration and results, one needs to be fit mentally and physically which depends on your diet.

How did you deal with stress?

Playing cricket or taking a nap between studies were the biggest stress busters for me. After playing a game of cricket, I always felt relaxed, energized and fresh to study further.

Who is your role model?

My role model has always been Sachin Tendulkar. I like his humbleness, his approach towards people and I greatly respect his will to improve every time and never say die attitude. He provides a boost of inspiration for me.

What course have you enrolled in now and what is your career goal?

I have opted for the Science stream since there are numerous fields in Science. But there is no specific goal as such. At the same time I would like to choose a profession where I can contribute something to my nation.

Give a message for the present Std X batch.

Study regularly and sincerely from day one onwards. Believe in quality rather than quantity of study. There is a need to be serious but at the same time be relaxed and study without pressure. And the most important message is - Enjoy this year to the fullest that you can because these school days are never ever going to back in your life and you will always miss them.
